Jesse –

Lt. Flaa reviewed your locations and gave the following comments.

Let me know if you need anything else from us.

Thank you,

Dan

Commander,

First, this is an amazing mapping / camera placement presentation by Flock. It is extremely comprehensive and impressive. As far as the placements of the cameras by Flock, I noted the following that were not consistent with our recommendations:

Camera #1: If possible, I would like to see the camera moved north of the actual intersection of Preisker and Broadway. This way, we capture all traffic that continues southbound and that may turn onto Preisker Lane from Broadway.

Camera #2: I would like to see this camera moved south of the intersection for the same reason re: the potential of traffic turning off Broadway onto Preisker before they drive into camera view.

Camera #19: The camera is listed as "EB Betteravia" when it appears to be placed to capture westbound traffic. Perhaps it should be retitled as "WB Betteravia," otherwise, placement is okay.

Camera #20: This camera is listed as "WB Betteravia. It does capture WB traffic, but it's placed east of 101. I recommend this camera be placed on the south side of Betteravia, facing east, just west of Bradley. This way, we would capture traffic on Betteravia travelling eastbound that the traffic that turns southbound onto Bradley.

Camera #21: This camera is located at Smith and Morrison. I recommend it be moved more westward to capture EB Morrison from Depot traffic.

Camera #22: This placement may be OK, if it will capture all NB Depot from Morrison

traffic, even the cars that turn off of Morrison onto NB Depot. If it will not, then I recommend moving the camera onto NB Depot north of Morrison.

If there are any questions, please let me know.

Thank you,
Terry

Terry –

Could you please double check the locations in the link below to make sure they match your recommendations? Once completed, we can move this project forward.

Thank you,

Dan

Good Afternoon Commander Cohen,

Here is the deployment link for the locations you provided. Most of the locations I was able to find a suitable location for, and a couple I had to make an adjustment to....for instance #1 and #2 I had to move to the other side of the intersection from what was requested due to lack of a good location. But for the most part, all should be good to go.

https://planner.flocksafety.com/public/7611147b-dc88-43cf-a0db-1b4074e92c92

Please review the locations and let me know they are good to go. Once you do so, I will then engage my team to evaluate angle, solar visibility, and confirm best fit. If they request changes, I will let you

know.

Once you think these locations work, please connect us with public works and a link to permitting (if required) and let me know if a business license is needed.

We are getting closer!
Best Regards,

Jesse Mund
